DB-2000

2-1/2-Inch Door Bell

IQAmerica

ENGLISH PRODUCT MANUAL

POWER AND WIRING

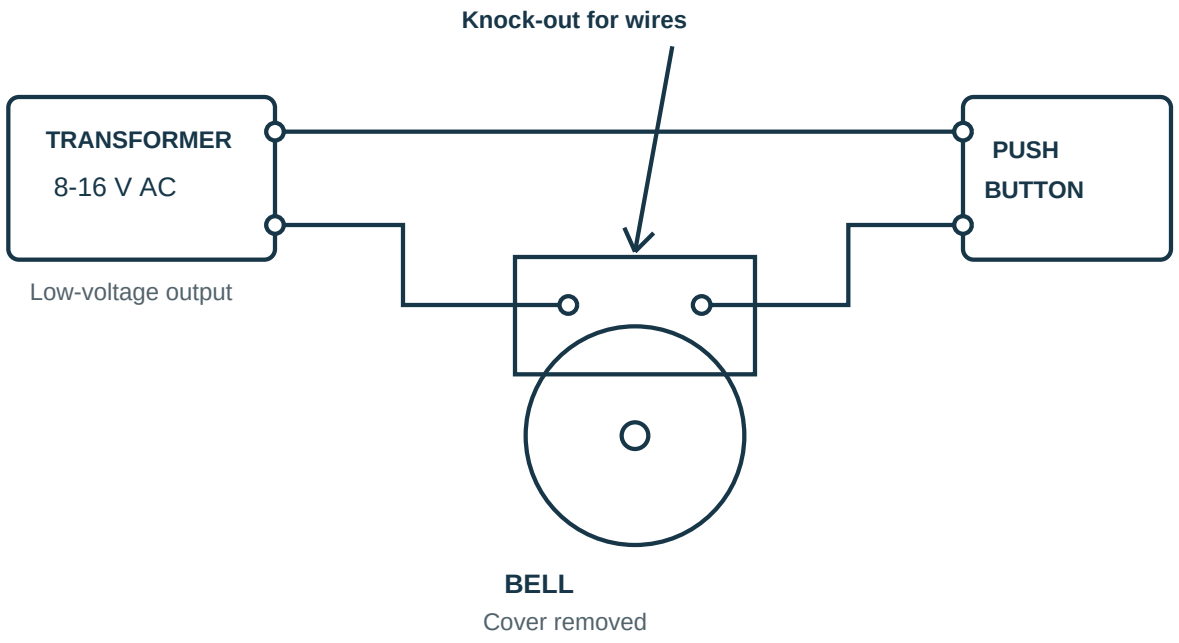

Battery power	**3-6 V DC**
Transformer power	**8-16 V AC**
Recommended wire	**No. 20 AWG**
Transformers listed on packaging	**DT-1610A or DT-1624A**

PACKAGING NOTE

Packaging states: "Adjusted for 10 to 16 Volt operation." No adjustment procedure is shown on the supplied label.

TRANSFORMER WIRING DIAGRAM

Low-voltage side only. Bell shown with cover removed.

Connect the push button, bell and low-voltage transformer output in the series circuit shown above. Use the recommended 20 AWG wire.

BEFORE WIRING

Disconnect power. Do not connect the bell directly to household mains.

Recreated in English from manufacturer packaging supplied for DB-2000. The source shows transformer wiring; it does not show a battery wiring diagram.
